

Dear Hiring Manager,

I am writing to express interest in the M2 Engineering Manager role at your top-tier company. I bring over seven years of experience in cloud security, testing infrastructure, and AI systems-blending deep engineering with people-focused leadership.

At Oracle, I managed scanner delivery (SLAPS, ESP, MASS), working with SRE and security teams to ensure reliability and speed. At Huawei, I led testing for SFS 2.0, automating compliance workflows and reducing cycle time by 45%.

As CEO & CTO of morescience, I recruited and led multiple product teams. We built AI-powered tools (morerent, morejob) using compressed storage and privacy-first designs. My leadership spanned hiring, roadmap execution, and early-stage fundraising.

I lead through clarity, mentorship, and alignment-balancing velocity with quality. I maintain hands-on fluency in cloud infrastructure and contribute to architecture reviews regularly.

Thank you for the opportunity.

Sincerely,

Yuxuan Zhou
